TECHNOLOGY INFRASTRUCTURE: YOUR FOUNDATION FOR SUCCESS

We understand there are many technology partners to choose from, and your number one priority is achieving the best quality at the best price. At ZeroDay Technology Solutions, we bring a large portfolio of successfully implemented nationwide projects and years of experience to the table. What sets us apart is our continued drive and passion to develop long term partnerships and trust with our customers. We own and deliver solutions from inception to completion.

We pride ourselves on the peace-of-mind we deliver to our customers from the first assessment to the final deliverable. We service the entire spectrum: single offices to multi-building campus environments. ZDTS is a BICSI Corporate Member and has multiple engineers with the RCDD (Registered Communications Distribution Designer) and OSP (Outside Plant Design) credentials on staff. Our Certified Engineering Team will work with you and your team to define the scope, perform an onsite assessment, map out your specific requirements, and deliver complete solutions in a timely and cost-effective fashion.

Bottom Line: Our goal is to create, build, and maintain long-lasting business relationships that outlast the technology. We are **TECH DRIVEN | PARTNERSHIP POWERED.**

follow our journey  

INFRASTRUCTURE

We design and execute your IT framework.

Layer 1 Cabling

We architect and install the basic hardware transmission technologies and physical media (copper/fiber cables, data centers, etc.) needed to move data across networks.
